

Botulinum and Tetanus Toxins

Price List 2026

Botulinum and Tetanus Toxins

Products listed below are intended for research purposes only and NOT for use in humans.

All material was obtained from viable *Clostridium botulinum* or *Clostridium tetani* cultures of the indicated subtypes. We offer four different qualities/preparations:

- (1) The purified Botulinum Neurotoxins as 150 kD toxins, biologically active or
- (2) inactivated by formalin treatment (toxoids)
- (3) the toxin complexes composed of the neurotoxin and the complex proteins (NTNH, and hemagglutinins, depending on the individual subtype) for Botulinum toxins, and
- (4) semi-purified *Clostridium botulinum* and *Clostridium tetani* culture supernatants.

If you need assistance, which product best suits your needs, please feel free to contact us.

The list will be continually updated with other types and subtypes upon availability. For regular updates please check our website at <http://www.mipro lab.com>.

For individual solutions or contract manufacturing and purification, please enquire.

All prices are in Euro, excluding VAT, packaging and shipment. Since export restrictions apply, all orders for biologically active toxins outside the EU require an export permit. An additional surcharge of EUR 150 to 250 per shipment therefore applies to these orders.

- (1) purified Botulinum Neurotoxins and Tetanus Neurotoxins
150 kD toxins, biologically active (P)

Product name	Cat. No.	Unit sizes	Unit prices [€]
P-BoNT/A1	#3101	10 µg	280.00
		100 µg	890.00
		1 mg	3,800.00
